

## **EDEN ROC RESORT LOCAL COMMUNITY POLICY**

Here in EDEN ROC RESORT we are committed to helping and preserving traditions and values of our local community and contribute to the development of local businesses.

For this reason, we have developed a policy to communicate with local people and local businesses on all aspects of our organization so that we can harmonize our relationships, in order to have a sustainable and mutually profitable relationships.

The Eden Roc always buys from local farmers and commercial products for the possible operation of the unit. The hotel also uses cut grass and flowers to create fertilizer for the crops, in order to minimize any environmental impact.

EDEN ROC RESORT has even begun to produce its own extra virgin olive oil with the EDEN ROC RESORT label from olives grown in the small olive field which is bottled by local businesses.

Through these products, the company aims to promote the local community and local culture to its visitors and international partners.

Regarding volunteering, management meets annually with local authorities and organizes days of volunteering in order to keep local roads and beaches clean.

Also, the hotel organizes weekly environmental activities for children, they were either clean surrounding beaches, or go harvest hotels crops, thus helping them to learn about local agriculture and volunteering .

In May 2017 we developed as a Hotel our own Blood Bank and donated 32 liters of blood to the Local Community.

Also, as for the promotion of local businesses, EDEN ROC RESORT only features local car rental companies, and other local providers and restaurants.

Finally, the company first examines local businesses to market products and generally prefers locally produced products in all aspects of its activities.
